What a creative way to introduce the love of designing your own space to children. The drawings

are so pretty with pastels and bigger than life imaginative dreamscapes. A lovely book to get the creative and personalized ideas flowing. The imagery was really one of the best features and how the artist and the author made the room burst with personality. If the book wasn't enough, you also can get your own special design kit after reading the book. What a way to spur imagination. This book was a huge hit. I mean if Emily can find her own design ability, then so can we all.

First of all, I couldn't design my way out of a cardboard box. So, the fact that this is written in simple terms, that even a child can understand, gives me hope that I could actually put my passions into a blank space. Katherine Allen obviously has some fabulous credentials and could speak eloquently about space and design. But, this colorful book tells me she has a fresh, child's eye when she considers space. With the workbook in the back, it's a GREAT primer for anyone who is tackling their first (second...third...) decor project. Aside from all that ^^^... This is the CUTEST little book! I L-O-V-E the illustrations!

What a wonderful book about the design process. Katherine describes the design process in a format that is both playful and approachable for readers of all ages. Many times I have found it difficult to start the process of bringing an idea or concept into action, although next time I think about starting a project, I will easily be able to reference little Emily and her playful and experimental attitude about creating spaces that inspire and inform the soul. I love everything about this book, and would highly recommend it to anyone who simply wants to add a little cheer to their day and gather valuable information at the same time.

Emily is a wonderful child with a whimsical mind. She daydreams of the things she loves, and imagines how she could decorate her new room with these things. This book is creative and inspiring! Emily focuses on the things she loves: the Grandmother Tree in the backyard, the magic mirror, seashells, sandcastles, seagulls, and the colors she loves. This book can help children's creativity grow as they imagine how to decorate their space with the things they love. Emily is organized and she plans out how she wants to decorate her room by making lists and drawings. This teaches children the importance of making plans before taking actions. By surrounding herself with the things she loves, Emily creates a supportive atmosphere. This book teaches readers that creating atmospheres filled with the things you love can help you live out your dreams. This book also ends with a wonderful guide for readers to design spaces that make them happy. This book could be a great tool to inspire young interior decorators, or any reader who would like to learn

about decorating inspiring rooms.

A wealth of knowledge of design condensed into an adventure of spirit. A great lesson for a child, or adult to create a space from their own likes instead of trying to conform to the fleeting trends of peer pressure.

Wow! A great childrens' book for anyone wanting to create a space for child to teen to help bring out the best in them! But this book is far from being just for kids! My 7,10, and 14 yr old BOY loved it, but I LOVED it the most. Using the toolbox included, I was able to create an environment that supports me and helps me thrive in business and my personal life! This book is fun, beautiful, and can make you money in your life to attract abundance, joy, and peace.

I bought 3 of Katherine's books as Christmas gifts for my 3 granddaughters. At first, they were not intrigued, until I sat down and read with them. Oh, my.....the creative ideas starting flowing and questions were formed into ideas. When my daughters heard what was happening, they jumped in to be involved. Is it a book for children or is it a book for adults??? Get to reading it with your daughter or granddaughter and you'll find out!

In reading Emily's Room I was struck by the lack of books directed at young people that really gave them the option of getting to know themselves personally. The lay out in the book of designing a space for themselves in this world was simple and down to earth. It talked about designing a place for themselves rather than a "bedroom" which many kids do not have the luxury of having so I thought that was really clever. Learning to be comfortable with yourself early is the best defense to conflict later in life. I would recommend it to anyone.
