Synopsis

Much more than a simple certification study aid, this comprehensive 1,248 page book is designed to help you master all aspects of IBM DB2 database administration and prepare you to take and pass IBM's Certification Exams 611 and 311: Certified Database Administrator. Building on years of extensive hands-on experience, the authors step you through all the areas covered on the test. The book dives deep inside each certification topic: DB2 server management, physical design, business rules implementation, activity monitoring, utilities, high availability, security, and connectivity and networking. There is even a "crash course" chapter on DB2 10.5 features. Each chapter includes an extensive set of practice questions along with carefully explained answers. This book provides more than 400 practice questions and answers, more than 120 "flash cards" to help you study for the exam, and 50 step-by-step DB2 feature implementation procedures.

Book Information

Paperback: 1248 pages

Publisher: Mc Press; Stg edition (August 6, 2015)

Language: English

ISBN-10: 1583473750

ISBN-13: 978-1583473757

Product Dimensions: 7.1 x 2.4 x 9 inches

Shipping Weight: 3.5 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 starsÂ Â See all reviewsÂ (10 customer reviews)

Customer Reviews

" DB2 10.1/10.5 Certification Guide " had found a place in my book shelf since 10 months or more . Point to worry or wonder then is , why am I am writing a review after 10 months or more . Reasons are simple .1. Firstly , I am a slow (may be the slowest in my team) reader and take time to read a page a day . So until and unless I am not done reading through at least half the book , I had vowed , I am not going to write a review . 10 months is a good amount of time (for me) to judge how goodor bad a book is .That also speaks of the sheer volume of this book .2. Secondly , you often need to think twice or several times before describing(reviewing) serious things that surround you in your

day to day life .You observe the thoughts (as impacted by those serious things) as they fill you and then analyse your actions and movements as modulated by those thoughts . You feel extremely ecstatic on discovering newly profound changes/actions in you . I am saying all of these as I have observed myself to become and function as a better DBA (in terms of my thoughts and actions) after I have started reading " DB2 10.1/10.5 Certification Guide ". Yes , you guys have read it right . DBAs at the end of the day need to execute a lot to keep the databases at the prime of their health and think more than they execute . It is thereby important that what whatever we , the DBAs read (and understand) has to be so rich that our thoughts and actions become supremely royal to focus with our analytical skills to troubleshoot the myriad of database related problems .3. Thirdly , in this era of e-reading while I still prefer reading hard copies of books I can categorise books , that have found a place in my shelves in three categories.
